

VJ PERFECT AIR PRODUCTS
THE LEADING MANUFACTURER OF DUCTING

Manufacturing Facility:

Auto Folder

Plasma Machine

TDF Roll Former Machine

TDF Pneumatic Folder

Coil Lift Crane

Lock Former Machine

Hydraulic Power Press

WHY VJ PERFECT DUCTS??

- ★ Ultra Low Leakage
- ★ Highest Strength to Weight Ratio
- ★ High Energy Saving
- ★ Leakage Test Facilities
- ★ Quick Installation
- ★ Four Manufacturing Plants All Over India
- ★ Nationwide Sales & Support
- ★ Most Cost Effective Solution

FEATURES :

- ★ Highly accurate flange profiles and components ensure ease of fitting and high quality assembly
- ★ A Recessed groove on flange and radial groove on corner pieces for proper gasket seating.
- ★ Snap fit corner pieces to allow easy fitting at sites

Ducting Components:

TDF is a flanging system that consists of forming a flange profile on the duct ends, thus made out of a sheet from which the duct is fabricated. TDF is a 4 bolt duct connection system that eliminates time wastage. Rather than using separate connectors to assemble your system, TDF flanges are rollformed onto duct during the manufacturing process. This connection minimizes leakage and installation costs. These TDF flange eliminates the additional internal sealing around the edges of duct & thereby saves the labour & material.
